Technology

High Bridge School District Asbestos Management Plan

"The Asbestos Hazard Emergency Response Act (AHERA) 40 CFR 763 requires all schools from pre-K to Grade 12 to conduct inspections to determine if they contain asbestos containing building materials (ACBM). If they do, the ACBM must be categorized according to the type of material, its locations, current damage, and its potential for future damage and a detailed Asbestos Management Plan must be developed. The Management Plan details the inspection findings, and outlines the response actions the School Board intends to implement.

To accomplish these goals, the School now has on file at each school and in the Main Office a NJ State Department of Health approved Asbestos Management Plan for all school facilities. The provisions of the plan are being implemented in a timely and on-going fashion. It is your Board's desire to provide a safe and healthy facility for all students, employees and visitors.

The purpose of this memorandum is to satisfy the requirements of AHERA for written notice of the availability of the Management Plan for review. Should you desire, please contact the Board of Education Office for further details.

The High Bridge School District has Asbestos Management Plan and is monitored and overseen by RK Environmental, High Bridge Elementary and Middle School have not had any Asbestos Abatements in the recent years.

RK Environmental continues to conduct the Districts EPA AHERA Asbestos Management Plan for 6 Month periodic surveillance re-inspection. As well as the 3 year re-inspection. 6 month Asbestos inspection was conducted September 2024 and our 3 year inspection was conducted April 2019. No foreseeable abatements are planned or schedule for the school district.
