Cindy,

I thought that I might be able to talk with someone about the issue raised below before the next BOE meeting, but no one has gotten back to me yet. I was just informed that you are the one I should direct my questions to.

I'm an engineering consultant and expert in technologies that can be used to kill the virus, especially when it is floating in the air.

I'd like to be helpful (for no charge) to the High Bridge Schools to help keep the students and teachers healthy. Can you take a few minutes to talk with me over the phone? I'd like to know if there is any interest in technologies that can be used in the schools to reduce the chance of an outbreak of the virus.

Unfortunately, I will not be able to attend the next BOE meeting, since I plan to be visiting my sister in FL then. However, I may be able to participate by phone.

Thanks.

Have a good evening!

Peter
